

Queue outstanding over time, every 15min - Value Date is 2026-08-18

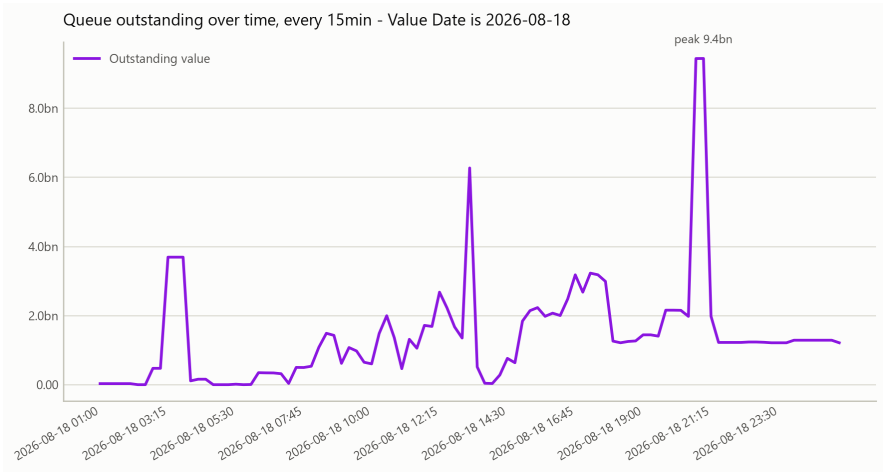

Generated 20 August 2026 at 11:30 · Synthetic / non-production data

Requested view

"Show how the approval queue evolved through 18 August in 15 minute intervals - what arrived, what cleared and what was still outstanding."

I will build a view showing how the approval queue evolved on 18 August, detailing what arrived, what cleared, and what was still outstanding in 15-minute intervals.

TOTAL ARRIVED 216 across 99 created time (15min)s	LARGEST 9 2026-08-18 16:15 - 4.2% of the total	CONCENTRATION 12% of the total in the top 3 of 99
--	---	--

Commentary

The report provides a detailed view of the approval queue's evolution on 18 August, showing the number of items that arrived, cleared, and remained outstanding at 15-minute intervals. Notably, there was a significant increase in the outstanding value at 03:15, reaching 3,687,545,845.16, which persisted until 04:30. The highest number of outstanding items was recorded at 09:00 with 26 items, although the outstanding value was lower at 616,592,174.23 compared to earlier peaks. Operations should closely examine the period between 08:15 and 09:45, where both the number of outstanding items and their values fluctuated significantly, indicating potential bottlenecks or processing delays.

99 time points are plotted. The shape is readable, but a coarser interval would make individual points easier to pick out. Arrived peaks at 9, Cleared peaks at 9, Outstanding peaks at 27, against 9.4bn for the largest series, so plotting it would be a flat line on the axis. It is in the table.

Limitations of this view

- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.
- The data is synthetic and non-production, with all identifiers and amounts fabricated.
- The display currency is GBP, using static synthetic FX rates.

What this view cannot tell you

Nothing was asked for that this data cannot supply.
