Commentary

The report displays the total transfer value by currency, highlighting each currency's share of the total, sorted from largest to smallest. The US Dollar (USD) is the dominant currency, accounting for 49.70% of the total transfer value, followed by the Euro (EUR) at 25.91%. The Mexican Peso (MXN) and Australian Dollar (AUD) also contribute significantly, with 7.44% and 0.74% respectively. Notably, the South Korean Won (KRW) and Hungarian Forint (HUF) have negligible contributions, each with a 0.00% share, indicating minimal activity in these currencies.

% of total Value Amount (Display) is a percentage and cannot share an axis with the amounts, so it is in the table only.
Only the largest 14 categories are charted; the remainder are combined into a single 'Other' bar. The full breakdown is in the table.

Limitations of this view

- Each share is calculated on 'Value Amount (Display)', the FX-translated amount, because the currency totals in 'Value Amount' are in different units and their sum would not be a meaningful denominator.
- 27 groups were returned. The 24 largest are shown individually and the remaining 3 are combined into "Other" - a breakdown this long is not readable as a management view. Ask for a specific group, or a top-N, to go further.
- The amounts are in different currencies and are therefore not directly comparable or summable.
- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.
- This is synthetic, non-production data.
