## Commentary

The report provides a breakdown of the total ledger value settling after 16:00 each day, categorized by currency and desk. The most significant contributor is the EUR currency, particularly in the BRCC sub-branch, with a substantial amount of 77,665,853,366.72. Notably, the BRBX sub-branch also shows significant activity in EUR and USD, with amounts of 14,375,758,416.69 and 12,825,628,251.33, respectively. An operations reader should closely examine the negative value in the "Other (111)" category, which stands at -114,370,900,617.22, as it may indicate an imbalance or offset that requires further investigation.

Only the largest 14 categories are charted; the remainder are combined into a single 'Other' bar. The full breakdown is in the table.

## Limitations of this view

- 135 groups were returned. The 24 largest are shown individually and the remaining 111 are combined into "Other" - a breakdown this long is not readable as a management view. Ask for a specific group, or a top-N, to go further.
- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.
- The amounts are translated using static synthetic FX rates to GBP.
- The data is synthetic and non-production.
