Commentary

The report provides a daily breakdown of total transfer values over the specified period, highlighting deviations from the average. The most notable day is August 4, 2026, with a transfer value of 207,385,479,699.57, which is 291.10% above the average, marked as unusual. This day stands out significantly compared to others, with the next highest value being July 29, 2026, at 108,139,872,566.63, which is 104.00% above the average. Operations should closely examine the transactions on August 4, 2026, to understand the cause of this substantial increase.

vs average % is a percentage and cannot share an axis with the amounts, so it is in the table only.

Limitations of this view

- 1 of 22 periods sit more than two standard deviations from the period average of 53,019,427,948 and are marked as unusual.
- 'Value Amount' is held in each row's own currency and this result spans 27 currencies, so adding it would combine unlike units. 'Value Amount (Display)' was used instead, which is FX-translated to a single currency.
- The amounts are in different currencies and are therefore not directly comparable or summable.
- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.

What this view cannot tell you

Nothing was asked for that this data cannot supply.

Dependencies

- The data is synthetic and non-production.
