

Count of records by Value Date (day) - Match is unmatched

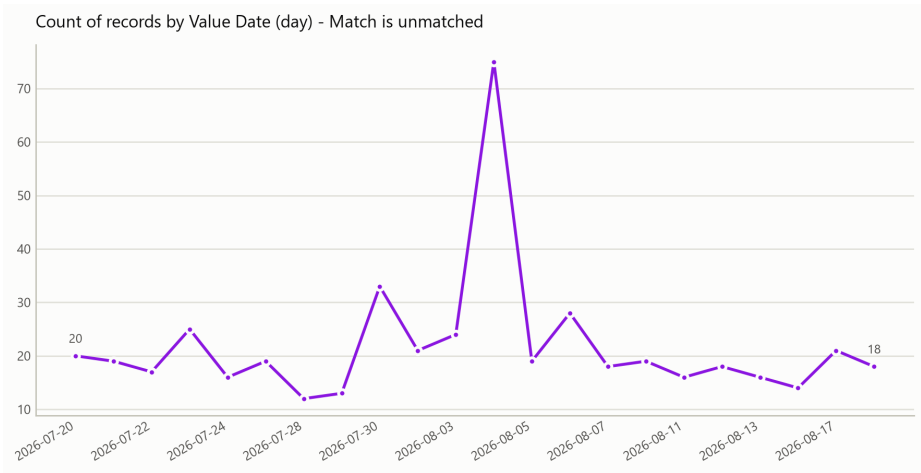

Generated 20 August 2026 at 11:29 · Synthetic / non-production data

Requested view

"Show the number of reconciliation breaks per day across the month, in date order, so I can see whether breaks are growing or being cleared."

The user wants to see the number of reconciliation breaks per day over the month to understand whether they are increasing or being resolved.

TOTAL COUNT 481 across 22 value date (day)s	LARGEST 75 2026-08-04 - 15.6% of the total	CONCENTRATION 28% of the total in the top 3 of 22
--	---	--

Commentary

The report displays the daily count of reconciliation breaks over a specified period, highlighting fluctuations in their occurrence. Notably, on August 4, 2026, there is a significant spike with 75 breaks, which is 243% above the average, marking it as an unusual day. This outlier suggests a need for further investigation into the causes of this anomaly. Overall, while there are fluctuations, the number of breaks generally remains below the average, except for a few days with notable increases.

vs average % is a percentage and cannot share an axis with the amounts, so it is in the table only.

Limitations of this view

- 1 of 22 periods sit more than two standard deviations from the period average of 22 and are marked as unusual.
- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.
- Data completeness depends on whether all transactions have been received and processed.
- This is synthetic, non-production data.

What this view cannot tell you

Nothing was asked for that this data cannot supply.
