

Value Date vs Difference (Local) by Account, Account Name, Currency - Match is unmatched

Generated 20 August 2026 at 11:29 · Synthetic / non-production data

Requested view

"Which client accounts had reconciliation breaks? For each one show how many days it broke and the total difference, worst first, so I can see the repeat offenders rather than every individual break."

Identify client accounts with reconciliation breaks, showing the number of days each account had breaks and the total difference in value by currency, sorted by the largest total difference.

TOTAL VALUE DATE	LARGEST	CONCENTRATION
41	3	22%
across 24 accounts	840264396104 - 7.3% of the total	of the total in the top 3 of 24

Commentary

The report identifies client accounts with reconciliation breaks, highlighting the number of days each account experienced breaks and the total difference in value, sorted by the largest total difference. The account "Liquidity HUF 05" had the most significant total difference, with a discrepancy of 23,834,846.18 HUF over 2 days. Other notable accounts include "Fees KRW 67" with a difference of 9,804,129.70 KRW over 1 day and "Liquidity NZD 65" with a difference of 6,294,663.84 NZD over 2 days. The operations team should particularly focus on accounts with large discrepancies, such as "Liquidity HUF 05," to understand the underlying issues.

Presented as a table; no chart was requested.

Limitations of this view

- Showing the 24 largest of 375 groups. The rest are omitted rather than combined, because averaging an average would not give a meaningful figure.
- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.
- The total difference is in local currency and grouped by currency to ensure comparability.

What this view cannot tell you

Nothing was asked for that this data cannot supply.

Dependencies

- The reconciliation status depends on the match tolerance setting of 0.01.

How these figures were produced
