Commentary

The report identifies Zephyr Clearing in Hong Kong as having the highest failure rate of transfers, with a rate of 10.50% relative to the total volume of 76 transfers sent to them. Sablewood Settlement Bank, also in Hong Kong, follows with a failure rate of 9.30% out of 75 transfers. Notably, Hong Kong venues appear prominently in the top three positions for failure rates, indicating a potential area for further investigation. Operations should particularly focus on the processes involving Zephyr Clearing and Sablewood Settlement Bank to understand the reasons behind these higher failure rates.

Failure rate % is a percentage and cannot share an axis with the amounts, so it is in the table only.

Limitations of this view

- The amounts are in different currencies and are therefore not directly comparable or summable.
- The view is scoped to the value date range from 2026-07-20 to 2026-08-18.
- Display currency is GBP, but the 'Value Amount' is in the transfer's own currency.

What this view cannot tell you

Nothing was asked for that this data cannot supply.

Dependencies

- The calculation of failure rate depends on the 'Transfer Status' and 'Message Status' fields.
